

## GIBECK TRACH-VENT

The original "Swedish Nose" with unique new features

### AT A GLANCE

Trach-Vent®  
Trach-Vent®+

- small, compact, low dead space, lightweight
- excellent humidification efficiency (also for O<sub>2</sub> supply)
- ISO standard connectors
- universal oxygen connector for Trach-Vent®+: one fits all
- suitable for adults and children
- single use – "infection prevention"
- latex-free
- phthalate-free
- PVC-free

### VERY HIGH HUMIDITY OUTPUT AND NEW IMPROVED DESIGN

Trach-Vent® and the new Trach-Vent®+ are synonymous with excellent humidification, especially designed for spontaneously breathing tracheostomized patients.

With a weight of only 4 and 6 g respectively, both HMEs (Heat and Moisture Exchangers) are very light. They have a low dead space of only 10 ml and can be used for adults as well as for children.

### TRACH-VENT®+

#### ONE FITS ALL

With its new universal and unique oxygen connector, the Trach-Vent®+ is now compatible with all available oxygen tubings in the market.

The unique built-in chamber for humidified oxygen supply and an integrated self-opening suction port make the Trach-Vent®+ the optimal choice in ICU.

### SUPERIOR HUMIDIFICATION CAPACITY

The moisture output of Trach-Vent® and Trach-Vent®+ has been increased to an excellent humidification capacity of 29.2 mg H<sub>2</sub>O/l at V<sub>T</sub> 500 ml. Provides humidified airways which ensures a well functioning mucus cilia system for infection prevention.

### TRACH-VENT®

Trach-Vent® has been in clinical use for more than 35 years. The combination of excellent humidification properties and a small, discreet design makes it ideal for your spontaneously breathing patients in ICU and ENT as well as in the home care environment.

**OXY-VENT®** is available with or without tubing and easy to connect to Trach-Vent®; provides humidified supplemental oxygen with up to 50%.

**Trach-Vent® Holder** minimizes patient trauma when exchanging the Trach-Vent®. Ideal for home care.
